```csharp
{
    // 2 references
    class Exchange
    {
        private string name = "Event Demo Stock Exchange";
        List<Stock> Stocks = new List<Stock>()
        {
            new Stock("PROG"),
            new Stock("C0D3"),
            new Stock("BYTE"),
            new Stock("GITH"),
            new Stock("VISO"),
            new Stock("NDIW")
        };
```
